EMFACE® | Functional

How EMFACE® Relieves TMJ Disorder

A powerful combination of HIFES® muscle stimulation and Sync RF heating delivers non-invasive relief for TMJ.

This dual-energy treatment works to:

- Relieve symptoms associated with muscle spasm
- Treat temporomandibular joint (TMJ) dysfunction and associated pain
- Re-educate muscles and increase blood flow
- Maintain or increase mandibular range of motion

Emface TMJ Ambassadors
